KRAYAURA

WEBSITE FINAL ADJUSTMENTS & M.I.A. RELEASE BRIEF

Project: Krayaura Official Website
Purpose: Final website adjustments ahead of the M.I.A. album release
Deadline: Wednesday, 4 November 2026
Website Preview: Thursday, 5 November 2026
Album Release: Friday, 6 November 2026

PART 1: M.I.A. ALBUM RELEASE & WEBSITE ROLLOUT

Before getting into the website adjustments, here is the updated release schedule and what needs to happen.

1. Album Release Date

M.I.A. is no longer releasing on Thursday. The official release date is now **Friday, 6 November 2026**.

The album is scheduled to become available at approximately **01:00 on Friday**.

I will only receive the streaming platform links as the respective platforms make them available.

Some platforms, such as YouTube Music, tend to provide links earlier, while others, such as Apple Music, may experience delays. Spotify should be ready by 01:00 Friday.

2. Streaming Links & Website Updates

The website will be the central destination for people accessing the album. Rather than sharing individual Spotify, Apple Music or YouTube Music links, I want people to visit my website and access the album from there.

Important deadline: Thursday, 5 November, at 08:00.

Ideally, I would like all available streaming links uploaded to the website by 08:00 on Thursday.

If this is not possible and you can only have everything ready by midday or another time, please communicate that with me in advance.

I understand that not all streaming links will be available immediately.

My plan is:

- I will send you each streaming link as soon as I receive it.
- Links that become available around 01:00 Friday will be forwarded to you immediately, or by approximately 03:00 at the latest.
- I will communicate with you through WhatsApp to make the process quicker.
- Please upload each link as soon as possible after receiving it.

The objective is to make the album accessible through the website as soon as the respective platforms make it available.

3. Thursday: Website & Album Preview Day

Thursday, 5 November, will now be the official website preview day.

The website must be completely ready by Wednesday, 4 November.

On Thursday:

- I will publicly share the website link.
- Visitors should be able to explore the entire website.
- Visitors should be able to preview the M.I.A. album.
- The website should communicate that the full album is arriving on Friday.
- The streaming links should be accessible if they have already been uploaded, or clearly indicate that the album is coming soon.

I will share the website link again on Friday, this time directing people to access the released album.

4. Monday: Music Video Release

I am potentially releasing a music video on Monday, 2 November. This is dependent on the videographer delivering the final footage.

I will promote the upcoming music video beforehand, directing people straight to YouTube when it releases.

The website will not be used as the primary destination for this music video release.

However:

- I will send you the YouTube link once it is available.
- Please add the music video to the Visual section of the website.
- It should be the first video visitors see in the Visual section, replacing the Crash trailer as the first item in the carousel.

There is no need to share the website specifically for Monday's music video release.

PART 2: WEBSITE ADJUSTMENTS — MOBILE

Mobile is particularly important because most of my listeners will access the website through their phones.

Please ensure that all text, buttons and elements are properly displayed, with no overlapping, hidden content or readability issues.

1. Header

Changes required

Album Cover

- Remove the large album cover currently displayed above the mobile header.
- Alternatively, if there is a clean way to integrate it into the header without repeating information, that is also acceptable.

- If integration makes the design unnecessarily complicated, simply remove it.

Now Serving M.I.A.

- Keep the small section at the top of the header displaying the album thumbnail, album information and 14 tracks.
- This looks good and should remain unchanged.

Header Text Order

The main heading should be:

1. M.I.A.
2. Breathing Through My Art

Keep this order.

Header Buttons

Please ensure all three buttons are visible, properly spaced and easy to access.

The buttons should appear in the following order:

1. Listen to M.I.A.

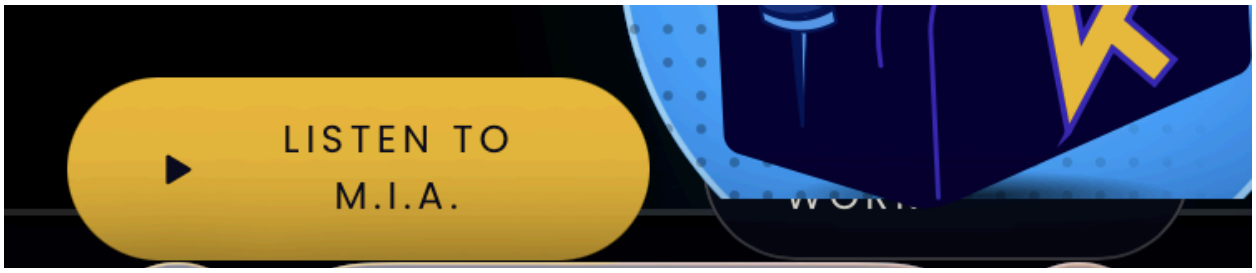

- This is the primary button.
- It should direct visitors to the album's streaming platforms, including Spotify, Apple Music and YouTube Music.
- Change the button colour to blue to make it stand out.
- Before release, it should communicate that the album is coming soon rather than directing visitors to unavailable streaming links.

2. Preview the Album

- This button allows visitors to listen to the album previews directly on the website.
- Temporarily, for Thursday, this button can display **Pre-save the Album** if we are using the pre-save link.
- I will provide the pre-save link on Wednesday.
- Please make sure the button is configured appropriately for the pre-save functionality.

3. Design Portfolio

- This button should take visitors directly to my graphic design portfolio section.
- Keep the wording short, direct and easy to understand.

Text Visibility

There are currently elements overlapping or hiding other content.

For example, the text describing my roles — Music Artist, Creative Director and Graphic Designer — is not displaying properly, with Graphic Designer being partially hidden.

Please correct these layout issues and ensure:

- All text is completely visible.
- All three buttons are visible.
- Nothing overlaps.
- The spacing is comfortable.
- Important headings and descriptions remain legible.

Other Header Adjustments

- The toast notification on the right can remain, provided it does not obstruct important content.
- Change the promotional strip from orange to **red** to better complement the M.I.A. campaign.
- Keep the existing Now Serving / Order Now messaging

.

2. Music Section

Everything in this section is working perfectly.

One adjustment:

- Change the artist name from two separate words to one word: **Krayaura**.
- Maintain this spelling consistently throughout the website.

The following elements should remain unchanged:

- Spotify link.
- Sample YouTube links.
- Timeline.

Spacing adjustment:

- Reduce the large gap between the timeline and the Watch the World section.

3. Album Section

The album section is perfect.

No changes required.

4. Crash & M.I.A. Sections

Both sections are perfect.

No changes required.

5. Visual Worlds / Design Portfolio

There is currently a large gap between the Visual Worlds heading, the accompanying description and the first portfolio item.

Please reduce this spacing so the portfolio content follows the heading more naturally.

6. About Section

The About section is perfect.

I will provide five new pictures to be added to the existing picture collection.

Please add these pictures without unnecessarily changing the existing layout or wording.

7. Let's Cook Something / Footer

There is a large gap between the Let's Cook Something section and the links at the bottom of the website.

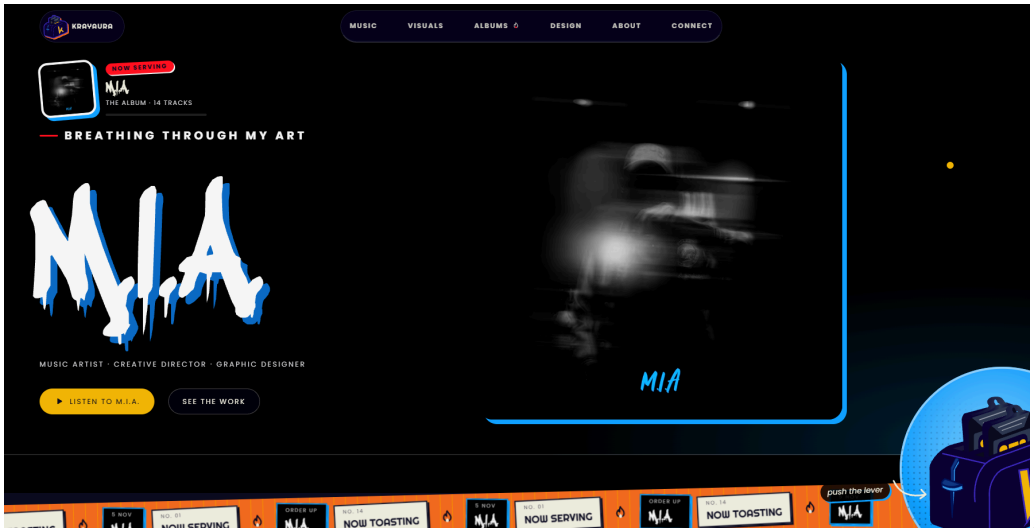

Please reduce this spacing.

That concludes the mobile adjustments.

PART 3: WEBSITE ADJUSTMENTS — DESKTOP

The desktop version is already looking great. Most of the adjustments below are refinements rather than redesigns.

1. Main Header

Alternative Header Artwork

Throughout the weekend, I will be working on additional headers and banners for Spotify, YouTube and other social media platforms.

I may send you alternative M.I.A. header designs, including versions without text.

If you feel that one of these designs would work better for the website header than the current square album artwork, you are welcome to use it.

This is optional and will depend on whether I can deliver the artwork in time.

I am happy with the current desktop header, so there is no need to change it unless the alternative artwork offers a noticeable improvement.

Header Text

Please maintain the following hierarchy:

1. **M.I.A.**
2. **Breathing Through My Art**

Make Breathing Through My Art slightly larger than it currently is, if possible.

Keep the Music Artist, Creative Director and Graphic Designer descriptions at their current size.

Header Buttons

The desktop header should have the same three primary buttons as mobile.

1. Listen to M.I.A.

- This should be the largest and most prominent button.
- It will eventually direct visitors to the album's streaming platforms.
- Before the release, display a Coming Soon state so visitors know the album is not yet available.

2. Preview the Album

- Direct visitors to the album preview functionality on the website.
- This will be particularly important on Thursday, during the website preview day.

3. Design Portfolio

- Direct visitors to my graphic design portfolio.
- Keep the wording short and punchy.

Streaming Platform Access (Just Suggestion and throwing ideas not necessary if not possible)

I would also like to make Spotify, YouTube Music and Apple Music easily accessible from the desktop header.

One possible solution would be to introduce a small secondary navigation area directly underneath the main header and above the existing streaming platform logo strip.

Alternatively, you could introduce a simple secondary menu.

The intention is to make it immediately clear where visitors can find my music on each platform without unnecessarily complicating the header.

Please use whichever solution works best visually and functionally.

2. Push the Lever

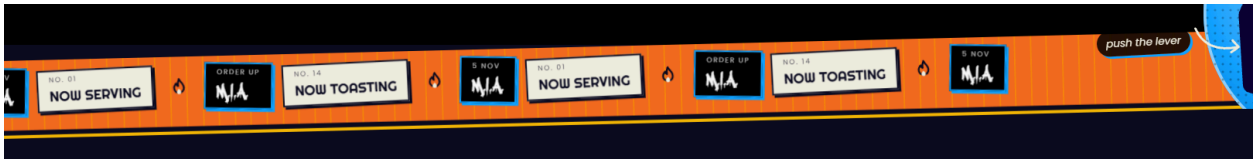

This section is perfect.

No changes required.

3. Promotional Strip

Change the existing orange strip to **red**, matching the mobile version.

No other changes required.

4. Welcome to My World

Everything in this section is good.

Please ensure the artist name is consistently written as **Krayaura**.

5. Floating Navigation

Connect With Me

I really like the existing Connect With Me floating element on the right side of the website.

Please leave it as it is.

New: Streaming Platforms (Just throwing ideas here not necessary if its gonna waste time or its not possible Ill trust your judgement)

I would like to introduce a similar floating element on the **left side** of the website.

The label should read:

Streaming Platforms

When clicked, it should display:

- Spotify
- YouTube Music
- Apple Music

It should function similarly to Connect With Me, which currently provides access to Instagram, Email and WhatsApp.

The intention is to make streaming platforms accessible from anywhere on the website.

Please maintain the existing floating navigation style and ensure both elements work together without obstructing the website content.

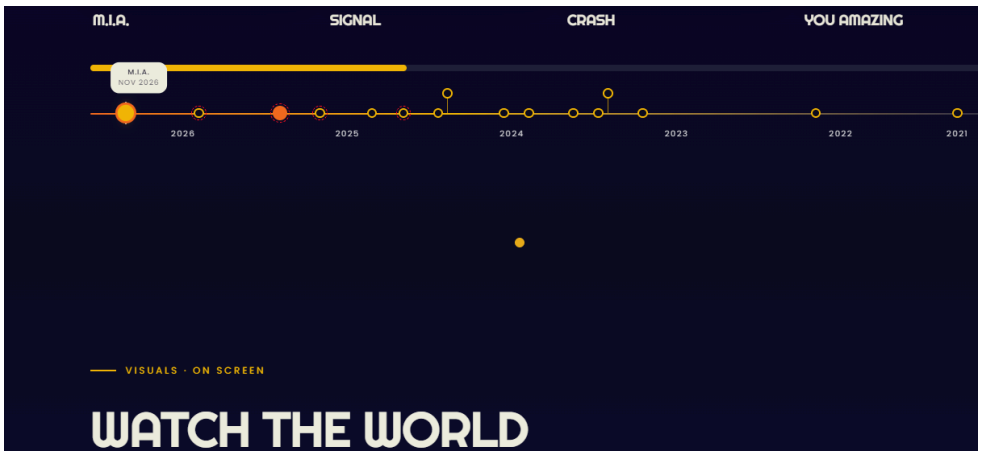

6. Timeline

The timeline itself is perfect.

No changes required.

Spacing adjustment:

- Reduce the large gap between the timeline and the Visual section of the website.

7. Visual Section — Watch the World

I am potentially releasing a new music video on Monday, 2 November.

Once I send you the YouTube link, please add the video to the Visual section.

Important:

- The new music video must be the first video visitors see in the carousel.
- Replace the Crash trailer as the first item.
- The Crash trailer should remain in the collection; it should simply no longer be the first video.

Everything else in this section is perfect.

8. Album Section

The album section is perfect.

One functional adjustment is required.

Please ensure there are two separate actions:

Play the Album / Listen to M.I.A.

- This should take visitors directly to the available streaming platforms.

Preview the Album

- This should allow visitors to listen to the album previews directly on the website.

Keep these two actions clearly distinguishable.

Everything else in the album section should remain unchanged.

9. Crash Section

The Crash section is perfect.

I like the contrast between the Crash and M.I.A. sections.

No changes required.

10. Visual World / Design Portfolio

The Visual World section is perfect.

No changes required.

11. About Section

The About section is perfect.

I will provide additional pictures to add to the existing collection.

Please incorporate the new pictures while keeping the existing wording and overall design unchanged.

12. Cassette Tapes

Perfect.

No changes required.

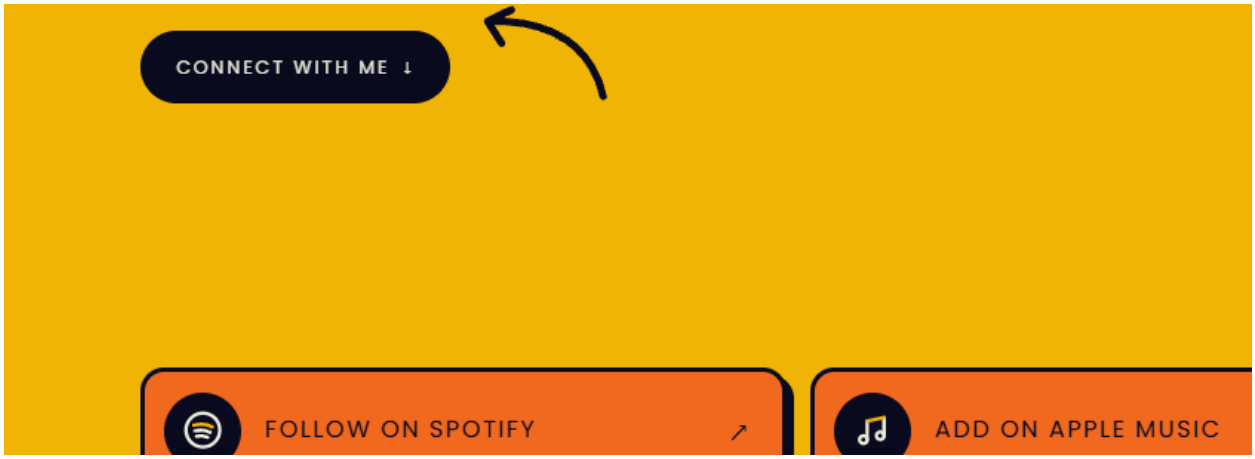

13. Let's Cook Something

The section itself is perfect.

Spacing adjustment:

- Reduce the large gap between Connect With Me and Follow on Spotify.

Everything else should remain unchanged.

PART 4: FINAL CHECKLIST & DEADLINES

Please use the following checklist to ensure everything is completed before the public website reveal.

Wednesday, 4 November — Website Completion

- Complete all mobile adjustments.
- Complete all desktop adjustments.
- Correct all overlapping and hidden mobile elements.
- Update the artist name to Krayaura throughout.
- Change the promotional strip from orange to red.
- Implement the three main header buttons.
- Configure the album preview and pre-save functionality.
- Implement the floating Streaming Platforms navigation on desktop.
- Reduce the specified spacing throughout the website.
- Add the five new About section pictures once supplied.
- Ensure the domain name is connected and working.
- Test all navigation, buttons, links and forms.

- Check the website on both mobile and desktop.
- Ensure the website is publicly accessible.

Thursday, 5 November — Website Preview Day

- Website is publicly accessible.
- Website link is ready to share.
- Album preview is functional.
- Pre-save button is configured with the supplied link.
- Available streaming links are uploaded.
- Upcoming album release information is clearly displayed.
- Confirm any outstanding streaming-link updates in advance.

Friday, 6 November — M.I.A. Release Day

- Upload Spotify link as soon as available.
- Upload YouTube Music link as soon as available.
- Upload Apple Music link as soon as available.
- Upload any remaining streaming platform links.
- Test all streaming links.
- Ensure the main Listen to M.I.A. button directs visitors to the appropriate streaming options.
- Website is ready for the official album release.

PART 5: IMPORTANT NOTES

1. **Please do not unnecessarily redesign sections that have already been approved.** The majority of the website is looking great. These are final refinements.
2. **Mobile responsiveness is a priority.** Most visitors will access the website through their phones, so ensure that all content and buttons are properly displayed.
3. **Keep the website simple and functional.** Where I have suggested possible solutions, you are welcome to implement whichever option works best, provided the intended functionality is achieved.
4. **Communication is important during release week.** Please let me know in advance if any of the deadlines cannot be met, particularly the Thursday morning streaming-link deadline.
5. **Streaming links will arrive progressively.** I will forward them as soon as I receive them, and we should upload them as quickly as possible.
6. **Approved sections should remain untouched.** Only implement the adjustments specifically outlined in this document.
